

XPlainVerse Dataset

End User License Agreement

(Research-only, non-commercial, no-redistribution licence)

Copyright (c) 2026 Abhijeet Narang, Kartik Kuckreja, Shreya Ghosh, Muhammad Haris Khan, Jianfei Cai, and Abhinav Dhall. All rights reserved.

The XPlainVerse dataset and associated materials are provided to support research on deepfake detection and explanation, including the development, testing, and evaluation of methods for identifying manipulated images and generating interpretable explanations of model decisions.

By signing this agreement, the requestor and the requestor's institution agree to comply with the terms below. If you do not agree to these terms, you must not access, download, store, use, or share the Dataset Materials.

For this agreement, "Dataset Materials" include the released image data, annotations, metadata, splits, labels, text explanations, manipulation and edit metadata, masks where provided, baseline files, evaluation scripts, restricted-access materials, documentation, and any other files made available by the licensors as part of XPlainVerse. "Derived Materials" include any transformed or extracted data, annotations, features, embeddings, indices, reconstructions, derivative datasets, model checkpoints, model weights, or other artifacts created using the Dataset Materials that contain, reproduce, encode, expose, or enable reconstruction of any Dataset Materials.

1. Research-Only Licence; Absolute Prohibition on Commercial Use

The Dataset Materials are licensed solely for bona fide academic or scientific research and education conducted on a non-commercial, not-for-profit basis by the approved researchers identified in this agreement. No other use is permitted unless the licensors give prior express written permission under a separate written licence. No ownership rights are transferred under this agreement.

Commercial Use is strictly prohibited. For this agreement, "Commercial Use" means any direct or indirect use intended for, directed toward, or reasonably connected with commercial advantage, monetary compensation, revenue generation, product or service development, operational deployment, competitive advantage, or other economic benefit to a for-profit person or entity.

Without limitation, prohibited Commercial Use includes internal corporate research or development; product, service, dataset, or model development or improvement; commercial benchmarking or evaluation; training, pre-training, fine-tuning, or evaluating a model that is intended or reasonably anticipated for commercial deployment; incorporation into any paid or revenue-generating product, API, platform, service, or workflow; paid consulting or contract research; procurement, due-diligence, marketing, or advertising activity; sale, licensing, sublicensing, or monetization of the Dataset Materials or Derived Materials; and use for commercialization or commercial intellectual-property development. Use by or on behalf of a for-profit entity is prohibited unless expressly authorized in writing by the licensors.

For avoidance of doubt: XPlainVerse is a research-only dataset. Commercial use is not permitted. A separate written commercial licence would be required for any commercial use, and the licensors are under no obligation to grant one.

2. Original Dataset Licences and Upstream Terms

You represent and warrant that you have independently obtained, and will maintain for the full duration of your use, any licence, permission, or lawful authorization required to access and use any original or source dataset from which the Dataset Materials are derived. You must comply with all applicable upstream dataset terms, conditions, attribution requirements, and use restrictions. This agreement does not grant any rights in any original or source dataset beyond those granted by the relevant upstream licence, and where an upstream licence is more restrictive, the upstream licence controls. Nothing in this agreement purports to license rights that the licensors do not own or are not authorized to grant.

3. Access Limited to Approved Researchers

Access is granted only to the requestor and the researchers expressly listed in this agreement under the identified institution. Each approved researcher must use the Dataset Materials only for the approved research purpose and is personally responsible for compliance with this agreement. You must not share login details, download links, copies of the Dataset Materials, or restricted files with any person who is not expressly covered by this agreement.

Access must not be extended to affiliates, collaborators, contractors, consultants, interns, students, vendors, external annotation services, cloud-service personnel, or other third parties unless each such person or entity has been expressly approved in writing by the licensors. Any additional researcher must be added to this agreement and approved before access is provided. Access is not transferable between institutions, laboratories, projects, or employers.

4. No Redistribution, Sublicensing, or Release of Restricted Derived Materials

Redistribution, republication, sublicensing, sale, transfer, posting to public repositories, uploading to shared drives accessible beyond the approved researchers, or dissemination of the Dataset Materials in whole or in part is prohibited without prior written approval from the licensors. Linking to the official XPlainVerse project or dataset page is permitted.

You must not publish, release, transfer, sublicense, or otherwise provide to any third party any Derived Materials that contain, reproduce, expose, or enable reconstruction of Dataset Materials. Public release of model checkpoints, model weights, embeddings, feature stores, derivative datasets, reconstructed samples, or similar artifacts created using the Dataset Materials requires prior written approval from the licensors, even where the proposed release is non-commercial.

5. Storage, Security, and Confidentiality

You must store and process the Dataset Materials only on access-controlled systems used for the approved research purpose and must apply reasonable technical and organizational safeguards, including access controls and encryption in transit and at rest where reasonably available, to prevent unauthorized access, copying, disclosure, or loss. Dataset Materials must not be placed in public buckets, public repositories, personal file-sharing accounts, or other systems accessible to unapproved persons.

You must not upload, transmit, or disclose Dataset Materials to third-party generative-AI services, hosted model APIs, external annotation platforms, data-processing vendors, or other third-party services unless the licensors have given prior written approval and the service is contractually prohibited from retaining, redistributing, or using the materials for its own training or other purposes. If you become aware of unauthorized access, leak, loss, or misuse, you must notify the licensors or dataset maintainers without undue delay and cooperate fully in mitigation and deletion.

6. Publications, Presentations, and Public Disclosure

Any publication, thesis, dissertation, preprint, benchmark report, technical report, poster, talk, demo, website, social-media post, or presentation arising from the use of the Dataset Materials must appropriately cite the works represented by the following BibTeX entries, and must also cite the applicable original/source dataset paper(s) and any documentation specified on the official XPlainVerse project or dataset page.

```
@misc{narang2026xplainversemillionscalebenchmarkexplainable,
  title={XPlainVerse: A Million-Scale Benchmark for Explainable Deepfake Detection},
  author={Abhijeet Narang and Kartik Kuckreja and Shreya Ghosh and Muhammad Haris Khan and Jianfei Cai and Abhinav Dhall},
  year={2026},
  eprint={2607.03562},
  archivePrefix={arXiv},
  primaryClass={cs.CV},
  url={https://arxiv.org/abs/2607.03562}
}

@misc{gupta2025multiversedeepfakesmultifakeversedataset,
  title={Multiverse Through Deepfakes: The MultiFakeVerse Dataset of Person-Centric Visual and Conceptual Manipulations},
  author={Parul Gupta and Shreya Ghosh and Tom Gedeon and Thanh-Toan Do and Abhinav Dhall},
  year={2025},
  eprint={2506.00868},
  archivePrefix={arXiv},
  primaryClass={cs.MM},
  url={https://arxiv.org/abs/2506.00868}
}
```

If the work uses challenge-specific data splits, evaluation protocols, metrics, evaluation scripts, baseline models, or other materials from the Explainable Deepfake Detection Challenge 2026, it must additionally cite the following BibTeX entry:

```
@misc{narang2026explainabledeepfakedetectionchallenge,
  title={Explainable Deepfake Detection Challenge},
  author={Abhijeet Narang and Kartik Kuckreja and Shreya Ghosh and Muhammad Haris Khan and Usman Tariq and Jianfei Cai and Abhinav Dhall},
  year={2026},
  eprint={2607.21007},
  archivePrefix={arXiv},
  primaryClass={cs.CV},
  url={https://arxiv.org/abs/2607.21007}
}
```

You may publish scholarly findings, aggregate statistics, metrics, tables, charts, and research code that does not contain or permit reconstruction of Dataset Materials. You may not publish, reproduce, display, or distribute arbitrary images from the Dataset Materials in any public-facing output. Only the specific images or examples explicitly designated in writing by the licensors for publication or public display may be used.

Unless the licensors approve otherwise in writing, publications and supplementary materials must not include Dataset Materials, restricted Derived Materials, downloadable sample archives, model checkpoints or weights trained using the Dataset Materials, embeddings or feature stores derived from the Dataset Materials, or information that would enable a third party to reconstruct, retrieve, or obtain unauthorized access to the Dataset Materials.

7. Prohibited Uses

The Dataset Materials and Derived Materials must not be used for any Commercial Use; for surveillance; biometric identification or re-identification; profiling; employment, credit, insurance, law-enforcement, immigration, or other high-impact decision making; unlawful activity; harassment; defamation; or any use reasonably likely to cause harm, humiliation, embarrassment, discrimination, or mental anguish to depicted persons or communities. You must not attempt to identify, re-identify, contact, track, or infer sensitive personal information about depicted persons.

The Dataset Materials must not be used to develop, train, pre-train, fine-tune, evaluate, validate, or improve any model that is intended or reasonably anticipated to be incorporated into, offered through, or deployed as a commercial product, API, platform, service, or internal commercial system. They must not be used to create a commercial foundation model, general-purpose model, dataset, benchmark, or data product. Any later commercial use of a model or other artifact developed using the Dataset Materials requires a separate prior written licence from the licensors.

Use of the Dataset Materials to generate deceptive, misleading, abusive, exploitative, or harmful synthetic media; to circumvent safeguards; to facilitate impersonation or fraud; or to reconstruct, invert, or extract protected Dataset Materials for any purpose other than the approved research is prohibited.

8. No Endorsement

The names of the licensors, dataset maintainers, affiliated institutions, sponsors, or contributors may not be used to endorse or promote products, services, or derived works without prior written permission.

9. Reservation of Rights; Suspension and Revocation

The licensors reserve all rights not expressly granted and may modify, update, suspend, restrict, or revoke access to the Dataset Materials or this agreement at any time, including in response to breach, suspected misuse, legal requirements, or updated upstream obligations. No continued access, availability, or support is guaranteed.

Upon reasonable request, you must provide information sufficient to confirm compliance with this agreement, including the identity of authorized users, the systems on which the Dataset Materials are stored, the research purpose for which they are being used, and written confirmation of deletion where deletion is required.

10. Disclaimer of Warranties

The Dataset Materials are provided "as is" and without warranties of any kind, express or implied, including without limitation warranties of correctness, completeness, accuracy, merchantability, fitness for a particular purpose, or non-infringement.

11. Responsibility, Liability, and Indemnity

You accept full responsibility for your access to and use of the Dataset Materials, the conduct of researchers covered by this agreement, and compliance with applicable law, this agreement, and all upstream licence obligations. You must ensure that no person obtains access through you except as expressly authorized. To the extent permitted by law, you agree to indemnify and hold harmless the licensors and dataset maintainers from claims, losses, liabilities, costs, or expenses arising out of your breach of this agreement or unlawful or unauthorized use of the Dataset Materials.

12. Termination and Deletion

This licence terminates automatically upon breach and may also be terminated or revoked by the licensors as provided in this agreement. Upon termination, revocation, expiry of the approved research purpose, or written request from the licensors, you must immediately cease all use and access and delete or destroy all copies of the Dataset Materials and all restricted Derived Materials in your possession or control, including working copies and copies held on approved cloud or compute systems, except to the minimum extent retention is strictly required by law or binding institutional record-keeping policy.

Upon request, you must provide written certification that deletion has been completed. Any retained copy required by law or binding institutional policy remains subject to this agreement, must be securely isolated, and must not be accessed or used except to satisfy the applicable retention requirement. Citation, confidentiality, no-redistribution, liability, and other provisions that by their nature should survive termination continue to apply.

13. Acceptance

By signing below, you confirm that you have read, understood, and agree to comply with this agreement, including the absolute prohibition on Commercial Use. You acknowledge that access is granted only for the approved research purpose and that no commercial, production, deployment, sublicensing, or redistribution rights are granted.
